

Build a Name Tag With MICRO:BITS

1

Navigate to
<https://makecode.microbit.org/#>
and select new project.

2

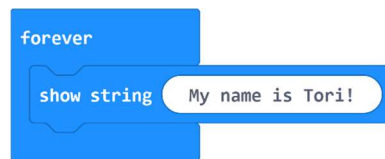

From the blue basic menu, select
and drag the '**forever**' command
into the editor box.

3

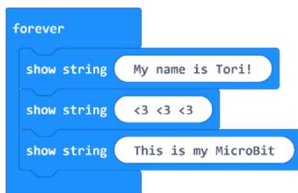

From the blue basic menu, select
and drag the '**show string**'
command into the '**forever**'
command on the editor.

4

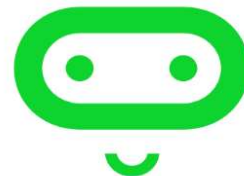

Change the text in **the 'show
string'** command to your name.

5

You can chain as many names or
text together as you want.

6

Now save and load your game
onto the Micro:Bit. Congrats,
you've made your own name tag!
